

Dumindu Malinga

Intern Mobile App Developer (Flutter)

malingabandara24256@gmail.com | Matale, Sri Lanka | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Third-year undergraduate pursuing a BSc in Information Technology (Rajarata University) and a Bachelor of Information Technology (UCSC), seeking an Intern Mobile App Developer role. Hands-on experience building and shipping Flutter/Dart mobile apps with Firebase-backed authentication and real-time data, including a 9-screen product prototype (LiviSpace) and a personal finance tracker (WealthWise). Comfortable with Git, native Android (Java), and learning new frameworks quickly.

EDUCATION

BSc Information Technology (Reading)

Rajarata University of Sri Lanka

2023 – Present | Focus: software development, database systems, networking, and modern IT.

Bachelor of Information Technology (Reading, External)

University of Colombo School of Computing (UCSC)

2024 – Present, pursued concurrently with the BSc | Focus: software engineering, mobile app development, databases.

CORE SKILLS

Languages: Dart, Java, JavaScript, SQL, HTML5, CSS3, C/C++

Mobile: Flutter, Android (Java), Responsive & Adaptive UI, State Management

Backend & Cloud: Firebase Authentication, Cloud Firestore, RESTful API concepts

Databases: MySQL, SQLite, Firebase Realtime/Firestore

Web (secondary): React, TypeScript, Vite, Tailwind CSS, Express.js, Supabase

Tools & Practices: Git, GitHub, VS Code, Android Studio, Figma, Agile/Scrum basics

Soft Skills: Teamwork, Problem Solving, Communication, Adaptability, Quick Learner

KEY PROJECTS

WealthWise — Personal Finance Tracker

Flutter, Dart, Firebase Auth, Cloud Firestore

- Built a personal finance management app for tracking income, expenses, and budgets in real time.
- Implemented Firebase Authentication and Firestore integration with a clean, responsive Flutter UI for budget visualization.

LiviSpace — Interior Design App

Flutter, Dart

- Developed a 9-screen AI-assisted interior design prototype covering auth, floor-plan upload, mock AI processing, room selection, and layout recommendations.
- Structured the app into modular screen components with a dark-themed, modern UI, demonstrating end-to-end product thinking across a full user journey.

InteriorAI — Interior Design Platform

React, TypeScript, Vite, Tailwind CSS, Express, Supabase

- Built a full-stack floor-plan-to-3D design platform: a 12-page React/TypeScript frontend and an Express REST API secured with Helmet, CORS, and rate limiting.
- Integrated Supabase for auth, storage, and admin management; implemented the flow from floor-plan upload through AI-assisted room detection to an interactive 3D viewer.

Video Player

Flutter, Dart

- Built a local video player app with custom playback controls and a Flutter-native UI.
- Implemented folder-based playlist auto-loading, seek/fast-forward/rewind controls, mute toggle, and automatic advance to the next video on playback completion.

Audio Player

Flutter

- Developed a cross-platform audio player app, exploring Flutter's media playback APIs and UI animation.
- Added audio recording, pitch/speed sound-effect presets, real-time waveform visualization, and a favorites system alongside core playback controls.

Personal Reflection App

Java, Android, Firebase

- Built a native Android journaling app with Firebase-backed cloud data sync.
- Led a 3-person team building GoalReflect, a goal-tracking and reflection app with Room (SQLite) persistence, Firebase Google Sign-In, a 5-channel notification/reminder system, and weekly progress reports.

Vehicle Classification Model

Python, Jupyter, ML

- Trained an image classification model to categorize vehicle types.
- Fine-tuned a YOLOv8 model on a custom-labeled dataset to detect and classify four vehicle types (car, bus, truck, motorcycle).

Plant Growth Analyzer

Python, Jupyter, Data Science

- Built a data analysis project modeling and predicting plant growth patterns.
- Used OpenCV-based image processing (HSV segmentation and contour detection) to measure plant height, leaf count, and health from daily photo captures.

INTERNSHIP AVAILABILITY

- Immediate availability, full-time or part-time (3–6 months, extendable), open to on-site, hybrid, or remote work
- Languages: English, Sinhala
